trading standards law explained

Units of measurement

In the guide

Metric units
Supplementary imperial units
Trading Standards
In this update
Key legislation

In this guide, the words 'must' or 'must not' are used where there is a legal requirement to do (or not do) something. The word 'should' is used where there is established legal guidance or best practice that is likely to help you avoid breaking the law.

This guidance is for England, Scotland and Wales

Metric units

If you are indicating units of weight or volume, only the permitted abbreviations (symbols) can be used. These are shown in the table below.

Metric measurements

Unit of measurement Symbol

Metre m Centimetre cm Millimetre mm m^2 Square metre \mathbf{m}^3 Cubic metre lor L Litre Centilitre cl or cL Millilitre ml or ml.

Tonne t

Unit of measurement Symbol

Kilogram kg
Gram g
Milligram mg

Vulgar fractions are not permitted (unless it relates to a fraction of a pint). For example, 500 g cannot be expressed as $^{1}/_{2}$ kg.

If the word 'net' is used, it cannot be abbreviated.

Supplementary imperial units

Imperial units can be shown as well, but they must not be more prominent than the metric indication. The permitted units are shown in the table below.

Imperial measurements

Unit of measurement Abbreviation

Yard vd Foot. ft. Inch in Square yard sq yd Gallon gal Quart qt Pint. pt Fluid ounce fl oz Pound lb Ounce 07

Except where the law and trade practice dictates otherwise, liquids should be marked with a volume (ml or L, for example) and other products by weight (g, kg, etc).

Under the Weights and Measures (Quantity Marking and Abbreviations of Units) Regulations 1987, quantity indications must be easily visible, legible and indelible. Under the Weights and Measures (Packaged Goods) Regulations 2006, they must also be of a minimum height, depending on the pack size.

Trading Standards

For more information on the work of Trading Standards services - and the possible consequences of not abiding by the law - please see 'Trading Standards: powers, enforcement and penalties'.

In this update

No major changes.

Last reviewed / updated: October 2024

Key legislation

- Weights and Measures (Quantity Marking and Abbreviations of Units) Regulations 1987
- Weights and Measures (Packaged Goods) Regulations 2006
- Food Information Regulations 2014

Please note

This information is intended for guidance; only the courts can give an authoritative interpretation of the law.

The guide's 'Key legislation' links may only show the original version of the legislation, although some amending legislation is linked to separately where it is directly related to the content of a guide. Information on changes to legislation can be found by following the above links and clicking on the 'More Resources' tab.
