[Key legislation](#)

In this guide, the words 'must' or 'must not' are used where there is a legal requirement to do (or not do) something. The word 'should' is used where there is established legal guidance or best practice that is likely to help you avoid breaking the law.

Although the United Kingdom left the European Union (EU) in 2021, certain pieces of legislation (known as 'assimilated law') continue to apply until such time as they are replaced by new UK legislation, revoked or permitted to expire. This means that our guidance still contains references to legislation that originated from the EU.

#### **This guidance is for Scotland**

The legal term for a product that partially consists of meat is a 'product containing meat' (the traditional term 'meat product' no longer has any legal meaning).

The terms 'meat' and 'regulated product' are defined in legislation, which requires certain types of regulated products containing meat to contain a minimum amount of meat.

There are also further requirements when the product contains particular types of meat. These are collectively known as 'reserved descriptions'.

The requirements below apply regardless of how the product is sold (prepacked, non-prepacked or prepacked for direct sale).

## What are products containing meat?

Meat-containing products are regulated products; all regulated products are covered by the Products Containing Meat etc (Scotland) Regulations 2014.

A 'regulated product' is defined in the Regulations as "a food that contains one of the following as an ingredient (whether or not the food also contains any other ingredient): (a) meat; (b) mechanically separated meat ...; (c) the heart, the tongue, the muscles of the head (other than the masseters [cheeks, which are considered to be meat]), the carpus [lower forelimb], the tarsus [lower hindlimb], or the tail of any mammalian or bird species recognised as fit for human consumption".

'Meat' is defined as "the skeletal muscle of mammalian or bird species recognised as fit for human consumption with naturally included or adherent tissue" (fat and connective tissue).

'Mechanically separated meat' (MSM) is defined as "the product obtained by removing meat from flesh-bearing bones after boning or from poultry carcasses, using mechanical means resulting in the loss or modification of the muscle fibre structure". If the product contains MSM, this must be declared separately in the ingredients list, in the format 'mechanically separated meat' followed by the animal species it comes from. Food must not contain MSM produced from cattle, sheep or goats.

Points (b) and (c) of the 'regulated product' definition above (MSM, heart, tongue, etc) are not meat, and do not contribute to the meat content of the food.

The following are not meat-containing products:

- Raw meat with no added ingredients (except proteolytic enzymes)
- Uncooked poultry with no added ingredients except additives, water, self-basting preparations or seasonings
- Fat with no meat

A certain amount of fat and connective tissue, up to set limits, is considered to be meat. Any fat and connective tissue over the set limits will not be meat and, if the permitted levels are exceeded, you must declare added fat and/or connective tissue in the product's ingredients list.

### Limits for fat and connective tissue

Type of meat	Pork	Birds and rabbits	Beef, lamb and other species
Fat	30%	15%	25%
Connective tissue	25%	10%	25%

## Making your own products containing meat

If you make your own products, ensure that you know, and stick to, the exact recipe and make due allowance for variations in mixing and/or manufacture.

## Compositional requirements for certain products containing meat

Some meat-containing products must have a minimum amount of meat and some can only include certain types of meat. These are summarised in the table below.

If your product does not contain enough meat, or contains a different type of meat to that allowed, you must not use the description given in the 'Name of product' column below. For example, a beef burger must contain a minimum of 62% meat; if it has less than 62% it cannot be called a beef burger.

Please note:

- X is used to refer to a specific type of meat, such as beef in beef burgers, pork in pork pies, etc
- Meat content for numbers 7-13 must be calculated by reference to the weight of uncooked ingredients
- 'Meat' includes cured meat

### Minimum meat content requirements

Name of product	Pork only	Birds and rabbits only	Beef, lamb and other species, or other mixtures of meat	Type of meat used
1. Burger	67%	55%	62%	If described as an X burger, the amount of X must be at least equal to the minimum required meat content
2. Economy burger	50%	41%	47%	If described as an X economy burger, the amount of X must be at least equal to the minimum required meat content
3. Hamburger	67%	N/A	62%	All pork, all beef or a mixture of pork and beef
4. Chopped X	75%	62%	70%	N/A
5. Corned meat, corned X	120%	120%	120%	All the meat must be X. Total fat content must not exceed 15%

<b>Name of product</b>	<b>Pork only</b>	<b>Birds and rabbits only</b>	<b>Beef, lamb and other species, or other mixtures of meat</b>	<b>Type of meat used</b>
6. Luncheon meat, luncheon X	67%	55%	62%	N/A
7. Meat pie, meat pudding, X pie, X pudding, game pie, weighing more than 200 g	12.5%	12.5%	12.5%	N/A
8. Meat pie, meat pudding, X pie, X pudding, game pie, weighing not more than 200 g and not less than 100 g	11%	11%	11%	N/A
9. Meat pie, meat pudding, X pie, X pudding, game pie, weighing less than 100 g	10%	10%	10%	N/A
10. Scottish pie, Scotch pie	10%	10%	10%	N/A
11. Meat and something else pie, meat and something else pudding, X and something else pie, X and something else pudding	7%	7%	7%	N/A
12. Something else and meat pie, something else and meat pudding, something else and X pie, something else and X pudding	6%	6%	6%	N/A
13. Pasty, pastie, bridie, sausage roll	6%	6%	6%	N/A
14. Pork sausage (but not pork liver sausage or pork tongue sausage), pork link, pork chipolata, pork sausage meat	42%	N/A	N/A	N/A
15. Sausage (but not liver sausage or tongue sausage), link, chipolata, sausage meat	32%	26%	30%	N/A

### **Sales to mass caterers and other food businesses**

These must comply with the same minimum standards as products sold directly to consumers.

## Uncooked products containing meat

Certain parts of the carcass of mammalian species may not be used in uncooked meat-containing products (brains, feet, small and large intestine, lungs, oesophagus (gullet), rectum, spinal cord, spleen, stomach, testicles, udder). Uncooked intestines may be used as casings for sausages. If sausage casings are inedible, then this must be stated.

## Specified risk material (SRM)

SRM is the parts of an animal that represent the highest risk of carrying disease.

The sale of SRM and the sale of any food containing SRM for human consumption is banned, as is the use of SRM and the sale of SRM for use in the preparation of food for human consumption.

For information on what parts of an animal are included in the definition of SRM, please see '[Home slaughter for private consumption](#)'.

## Meat content declaration (QUID)

Any ingredient mentioned in the name of the food, emphasised on the food, or generally associated with the food must be given a 'quantitative ingredient declaration' (QUID), which states how much of the ingredient is in the food in the form of a percentage of the entire product. If specifying the species or cut of the meat (for example 'Pork sausages') you will need to declare how much is present.

Detailed information on the QUID declaration for products containing meat can be found in '[Labelling of prepacked foods: QUID](#)'.

The QUID requirements for products containing meat apply equally to products that are non-prepacked, prepacked or prepacked for direct sale.

## Formed meat

Any product containing meat that looks like a single piece of meat, but is actually several pieces joined together with other ingredients, needs to be labelled with the statement 'Formed meat'.

## Additives

The types and amounts of additives, such as colours and preservatives, that can be used in products containing meat are strictly controlled. Some are banned, whereas others may be limited to certain foods, and in certain amounts.

For more detail on colours, see '[Colours in food](#)'; there is also information and business guidance on [additives and E numbers](#) on the Food Standards Scotland website. Please ask your local authority if you require further details.

## Name of the food

If any meat-containing product contains added proteins from a different animal, this must be stated in the name of the food (for example, 'Beef meatballs with added pork protein').

If you produce or sell uncooked cured or uncured meat-containing products that contain more than 5% water and have the appearance of a cut, joint, slice, portion or carcase of meat, you must include the words 'added water' in the name of the food (for example, 'Bacon with added water').

In most cases, prepacked foods must be labelled with a descriptive name that accurately describes the food. You will need to decide on a case-by-case basis whether any added ingredients will need to be stated in the descriptive name in order for the product to be accurately described.

## Protected food names

Certain food products, including Traditional Cumberland Sausage, Cornish Pasty and Melton Mowbray Pork Pie, have been accredited with protected status. Any products using this name must comply with the compositional (what it contains) and/or origin (where it is made) requirements. More information on [protected food names](#) is available on the GOV.UK website.

## Minced meat

Minced beef, minced turkey, etc that contains no additives or other ingredients is 'meat' rather than a 'product containing meat' and the requirements of this guide do not apply; for more information see '[Labelling of meat and products containing meat](#)'. Minced beef particularly has specific labelling requirements, including the country in which the animal was slaughtered, the country in which the product was minced and prepared, and a traceability reference number or code; see '[Labelling of beef](#)'.

However, products that use mince as an ingredient (and, therefore, consist of more than just minced meat) are 'products containing meat' and must follow the requirements outlined in this guide.

## Trading Standards

For more information on the work of Trading Standards services - and the possible consequences of not abiding by the law - please see '[Trading Standards: powers, enforcement and penalties](#)'.

In Scotland, food labelling laws are not generally enforced by Trading Standards services, but rather by Environmental Health. However, we have included In-depth Guides on food for Scotland in order to provide more comprehensive guidance.

## In this update

No major changes.

Last reviewed / updated: April 2026

## Key legislation

- [Food Safety Act 1990](#)
- [Assimilated Regulation \(EU\) No 1169/2011 on the provision of food information to consumers](#)
- [Food Information \(Scotland\) Regulations 2014](#)
- [Products Containing Meat etc \(Scotland\) Regulations 2014](#)

## Please note

This information is intended for guidance; only the courts can give an authoritative interpretation of the law.

The guide's 'Key legislation' links go to the legislation.gov.uk website. The site usually updates the legislation to include any amendments made to it. However, this is not always the case. Information on all changes made to legislation can be found by following the above links and clicking on the 'More Resources' tab.
